(Frequently Asked Questions in the back)

Questions and Answers:

AP computer science

1. Do I need java or other language background to take AP computer Science?

No but you do need to complete algebra 2. Teacher will also assign you some easy tutorials for the summer to prepare for next semester.

2. What programming language does this class use?

AP college board suggests using Java

3. How do I know I qualify to take this class?

Talk with your counselor first

4. Is this class hard, average, or easy?

Depends on individuals, some students are highly skilled and some are just beginners. Teacher will help students in all levels

5. Do I have to take AP test if I choose to take this class?

Yes. It is recommended and if you pass, you can enjoy credit awarded to your college study.

6. Is there anything I can do over the summer to prepare for this class?

Yes. The teacher will assign you a tutorial for you to study over the summer

7. Who should I take to about this class?

Anyone who is interested in engineering, math, computer, or just programming in general. Anyone who wants to challenge themselves and learn the skills of solving real-life problems.

Other programming questions

1. Between two programming classes, do I have to take one of them first?

No particular order needed. You can take the courses in any order based on your schedule.

2. Who should I talk with to see if I can take this course?

Start with your counselor and then Mr. Hsu

3. I don't have any programming experience. Can I take this course?

Yes. That is what these courses are for.

4. I don't have any computer experience. Can I take this course?

No. You have to have some basic computer or word processing skills. You can start with "computer application" course.
