

Dear Guardian/Parent of Incoming Seniors, Class of 2020:

Illinois law 098-0480 requires that any student entering the 12th grade and any student eligible to remain in public school beyond grade 12, must show proof of having received two doses of the meningococcal conjugate vaccine (Meningitis). The first dose is due on or after the 11th birthday and the second dose is due on or after their 16th birthday. If the first dose is administered when the child is 16 years or older, only one dose is required for entry into 12th grade. (Doses given before the 11th or 16th birthdays are considered invalid.)

The west campus nurse's office is accepting proof of Meningitis compliance for the class of 2020 now. If you have any questions please contact us at **630-295-5335**.

Sincerely,

Renee Riggio BSN, RN
